PROFESSIONAL SUMMARY

Technical Lead and Senior Software Engineer with 13+ years of experience in designing, developing, and deploying enterprise-scale applications across Banking, Finance, Telecommunications, and Retail domains. Proven expertise in Java, Spring Boot, Microservices, AWS Cloud, Terraform, Docker, Kubernetes, ReactJS, Spark, Kafka, Redis. Experienced in leading teams of 5 engineers, architecting cloud-native applications, implementing event-driven architectures, and delivering highly scalable enterprise solutions. Passionate about Agentic AI, LangGraph, AI agents, and modern AI-assisted software engineering.

CORE COMPETENCIES

Java • Spring Boot • Spring Cloud • Microservices • AWS • Terraform • Docker • Kubernetes • Kafka • Redis • ReactJS • Python • Spark • CI/CD • Jenkins • Spinnaker • Event Driven Architecture • System Design (HLD/LLD) • AI Agents • LangGraph • Agentic AI

TECHNICAL SKILLS

- Programming: Java 8/11/17, Python, JavaScript, SQL
- Backend: Spring Boot, Spring MVC, Spring Core, Spring Cloud, Hibernate, REST APIs
- Cloud & DevOps: AWS, Terraform, Docker, Kubernetes, Jenkins, Spinnaker
- Messaging: Kafka, Redis
- Frontend: ReactJS, HTML, CSS, JavaScript
- Architecture: Microservices, Event Driven Architecture, HLD, LLD
- AI/LLM: Agents/Agentic AI, LangGraph, Prompt Engineering, RAG, GitHub Copilot, Claude
- Monitoring: Grafana, SonarQube, Autosys

CERTIFICATIONS

- AWS Certified Developer Associate (DVA-C02)
- AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

- Bachelor of Engineering (Computer Science)

PROFESSIONAL EXPERIENCE

JP Morgan Chase | Senior Software Engineer / Technical Lead | Aug 2018 - Present

- Lead a team of 5 engineers in designing and developing enterprise applications for Corporate & Investment Banking.
- Architect and implement Spring Boot microservices and distributed systems.
- Lead AWS cloud migration initiatives using Terraform, Docker, Kubernetes, and Spinnaker.
- Develop event-driven architectures using Kafka for high-volume business processing.
- Implement secure REST APIs and enterprise integrations.
- Build ReactJS applications and cloud-native services.
- Process large-scale datasets using Python and Apache Spark.
- Implement Redis caching to improve performance and reduce latency.
- Design CI/CD pipelines using Jenkins and Spinnaker.
- Participate in High-Level Design (HLD) and Low-Level Design (LLD) activities.
- Mentor engineers, conduct code reviews, and drive engineering best practices.

Tangoe India Softek Services Pvt Ltd | Software Engineer | Jul 2015 - Aug 2018

- Developed enterprise applications using Java and Spring technologies.
- Implemented Spring Security solutions and received recognition for technical excellence.
- Built scalable backend services and enterprise integrations.

AI & PERSONAL PROJECTS

- CareerPilot AI: Built an AI-powered career recommendation and job discovery platform using Agentic AI concepts and modern web technologies.
- ArchitectIQ: Developed an AI-assisted software architecture and system design platform using AI agent orchestration.
- LendTrack: Designed and implemented a loan management and tracking platform.
- Portfolio Website: Created a professional portfolio showcasing enterprise and AI engineering projects.
- YouTube Channel – Ask AI with Aryan: Create educational content around AI, Agentic AI, software engineering, and emerging technologies.

LEADERSHIP

- Led and mentored a team of 5 software engineers.
- Conducted technical interviews, design reviews, and code reviews.
- Collaborated with architects, product owners, and business stakeholders.

AWARDS

- Outstanding Performer Award - JP Morgan
- Hall of Fame Award
